PROFESSIONAL EXPERIENCE

DekatLokal

Jan 2026 - Present

Founder & Product Lead

- Founded DekatLokal, an intervention-based UMKM Digital Checkup platform aiming to become Indonesia's leading personalized digitalization support system for small businesses.
- Led delivery of 15+ UMKM websites under the dekatlokal.com domain/subdomain ecosystem, with a 1-year support model and a roadmap to reach 50 UMKM beneficiaries.
- Built standardized website features: WhatsApp CTA, Google Maps, product/gallery sections, testimonials, SEO metadata, sitemap, favicon, and Google Search Console setup.

DekatLokal Studio

Jan 2026 - Present

Freelance Software Engineer / Digital Product Consultant

- Delivered business websites and internal systems for B2B/company clients, covering discovery, requirements, UI planning, development, deployment, and support.
- Translated client business processes into practical web solutions including company profiles, landing pages, catalogs, admin dashboards, and workflow-oriented systems.
- Handled GitHub, Vercel, Cloudflare DNS, responsive frontend implementation, SEO basics, and client-ready handover documentation.

Rumah BUMN Makassar

Dec 2025 - Mar 2026

IT Intern / Fullstack Developer Intern

- Developed a web-based employee attendance system supporting 40+ daily users with check-in/check-out, role-based access, attendance history, and verification workflows.
- Implemented GPS validation, selfie proof with timestamp/location watermark, permission requests, admin verification, leadership approval, recap dashboards, and Excel export.
- Designed 3 core role flows: peserta_magang, administrator_sistem, and pimpinan_sistem to improve workflow accountability and operational visibility.
- Prepared 13 UAT modules covering authentication, attendance flow, verification, reporting, analytics, and admin controls before deployment readiness.

Chayon Online Course

Jan 2025 - Jun 2025

Frontend Developer & Project Manager (Freelance)

- Led end-to-end development of the company’s main course website, from SRS drafting and partner requirement gathering to frontend implementation and delivery coordination.
- Developed the frontend using Next.js and collaborated on a Laravel Filament backend to support scalable content/course management workflows.
- Coordinated UI/UX planning, task breakdown, development priorities, and stakeholder communication across a 6-month product development cycle.

PT Pusat Andalan Sukses Terpadu

Jan 2025 - May 2025

Graphic Designer Intern

- Designed multi-format social media assets across 3 primary content types: Instagram feeds, stories, and Reels covers to strengthen online brand presence.
- Created promotional posters and corporate update materials for a tax consulting company, supporting service communication across digital channels.
- Maintained visual consistency by aligning layout, typography, and brand tone across recurring social media and promotional design outputs.

HesaLab

Feb 2025 - May 2025

UI/UX Designer Intern

- Redesigned 2 benchmark websites, Adidas and Wise, using a modern responsive UI approach across desktop, tablet, and mobile considerations.
- Built scalable Figma design systems using auto layout, components, and variants to improve design consistency and developer handoff readiness.
- Prepared structured UI documentation and design handoffs to support faster communication between design and development workflows.

SELECTED TECHNICAL PROJECTS

BOTTING - Stunting Prevention Chatbot

2025

KKN Project, Parepare City Government

- Built a Next.js-based chatbot with 20+ decision logic flows to help Posyandu cadres and residents access practical stunting-prevention information.
- Converted community health education material into a more accessible, interactive digital support tool for local beneficiaries.

U CAREER - AI Career Gap Analyzer

2026

AI-Based Career Matching Platform

- Developed an AI-powered platform using Google Gemini API to compare users’ CVs with job descriptions and identify skill gaps, role fit, and improvement recommendations.
- Designed the system to help job seekers evaluate career readiness through automated CV-JD matching and actionable feedback.

SI ABAH - AI Khutbah Assistant

2026

AI-Based Islamic Content Generator

- Built an AI-powered khutbah assistant to help students and public users generate structured khutbah drafts faster with dalil, summaries, and printable outputs.
- Developed multiple content-generation features to support practical Islamic writing needs through a simple and accessible web interface.
